EDUCATION

VIT Bhopal University, Bhopal

B.Tech - Computer Science and Engineering in AIML - **CGPA - 8.75**

2023 – 2027

Bhopal, Madhya Pradesh

Kendriya Vidyalaya OFK, Jabalpur

Class 12th - **Percentage - 81.4%**

2021 – 2022

Jabalpur, Madhya Pradesh

Kendriya Vidyalaya OFK, Jabalpur

Class 10th - **Percentage - 87.6%**

2019 – 2020

Jabalpur, Madhya Pradesh

EXPERIENCE

VOIS — Data Analyst

September 2025 - October 2025

Role - Data Analyst

Remote

- Completed a 4-week Conversational Data Analytics internship focused on LLMs and real-world AI solutions.
- Worked on a conversational AI project under industry mentorship, strengthening skills through project-based learning.

PROJECTS

RoadOps: Intelligent Road Damage Detection | [OpenCV](#) and [NumPy](#), [YOLOv8](#)

March 2026

- Developed an AI-powered road damage detection system using YOLOv8, capable of identifying potholes and cracks with instance segmentation and real-time analysis.
- Built a full-stack application (FastAPI + Next.js) with an interactive dashboard to visualize road conditions, telemetry, and structural health metrics.
- Orchestrated a severity scoring system incorporating area, roughness, and proximity metrics, pinpointing the riskiest 10% of road segments, leading to optimized resource deployment for preemptive maintenance strategies.

Clarity | [NLP](#), [Python](#), [BERT](#)

October 2025 - March 2026

- Developed and deployed a full-stack AI-powered news platform using React, TypeScript, and Vercel, delivering real-time news updates and analysis.
- Pioneered an AI chatbot, integrating Google Gemini API with serverless functions, to provide contextual explanations of news, resulting in a 40% decrease in information retrieval time.
- Implemented scalable cloud-based architecture with secure API handling and dynamic content rendering for enhanced user engagement.

Skill Parser | [LLM](#), [Genkit](#), [Gemini Flash](#)

March 2026

- Developed an AI-powered ATS using NLP and LLMs for semantic resume-job matching and candidate ranking.
- Built a multi-format resume parser (PDF, DOCX, images) with automated skill, experience, and education extraction.
- Designed a match scoring & gap analysis system to improve hiring efficiency and reduce manual screening time.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, CSS, SQL

AI / ML: Computer Vision, Natural Language processing (NLP), Large Language Models (LLMs), Semantic Analysis, NER

Core computer science fundamentals: Data Structure, Algorithms, Operating System, Computer Network, and Databases

CERTIFICATIONS

- Introduction to Internet of Things – NPTEL (Issued on 14th May 2026)
- Applied Machine Learning in Python – Coursera (Issued on 17th November 2025)
- NPTEL Cloud Computing Online Certification (Issued on 23th May 2025)
- Fundamental of AI and ML -Vityarthi (Issued on 3rd May 2024)
